EXPERIENCE

ROBOMQ | Software Engineer   Jaipur, India | Sep 2022 – Present

- Hire2Retire: Developed Hire2Retire IGA platform, saving $700,000 annually for average-sized companies. Improved onboarding rates by 30% through OAuth-based sync with Azure AD. Led ITSM Integration for streamlined HR-IT processes and enhanced workflows.
- Multiple Leave: Developed a comprehensive solution for supporting multiple leave types within the software features for our products. Led the redesign of the user interface for the Hire2Retire platform improving user experience.
- RSA Key Pair: Implemented and configured RSA key pairs for secure data encryption, strengthening system security for over 50 data transactions. Enhanced cryptographic solutions, reducing potential security vulnerabilities by 30%.
- Jest: Implemented the Jest testing framework for rigorous and efficient unit testing, increasing test coverage by 85%. Improved code reliability by identifying and resolving 30% more potential issues early in the development process.
- Backward Compatibility Script: Developed a script to ensure backward compatibility for 10+ software versions, minimizing disruptions during upgrades. Enhanced overall system stability by reducing version-related issues by 40%.
- Show more show less: Implemented a feature for displaying and hiding additional information in a user-friendly manner. Improved user interface design, providing users with more control over the displayed content.

GREAT LEARNING | Research Analyst   Bangalore, India | Feb 2022 – July 2022

- Solely responsible over 200 pages of original, copyright-free course-pack material and developed over a 100 unit-wise assessment questions for over 5 computer science courses, including DAA, Java, Operating Systems, DBMS, and Machine Learning.

SKILLS

Programming Languages	Javascript, Java, HTML/CSS
Libraries/Frameworks	Node.js, Angular.js, React.js
Tools / Platforms	Git, Github, AWS, Docker
Databases	MySQL, MongoDB

PROJECTS

POKEMON-FINDER | Link   React.js, Node.js, CSS, Git

- A pokemon finder application with search feature and paginated pokemons with their stats.
- Each page displays information of only 10 pokemons out of many pokemons retrieved from the API in paginated form.

JSON-PLAYGROUND | Link   React.js, CSS, JSON, Git

- Web application for effortless JSON parsing and compression, featuring a large view for detailed analysis and history retention of up to 10 parses. Streamlines workflow and boosts productivity by simplifying JSON management.
